JUAN DOUGH

223 Madvillainy Lane, Doomsville, NY
juandough@operationdoomsday.com | +1 (555) 36-CHAMBER

SUMMARY

Seasoned developer with a knack for building scalable systems while avoiding industry traps like Gas Drawls. Specializes in clean code, automation, and making sure the beat stays raw.

EMPLOYMENT

Full Stack Developer   **Rhymes Like Dimes Inc. | 2020 – Present**

- Engineered web apps with React.js and Node.js, boosting performance faster than Danger Doom's delivery.
- Refactored legacy codebases, cutting technical debt like Liquid Swords through spaghetti code.
- Implemented APIs smoother than Ghostface storytelling, ensuring seamless integration.
- Wrote documentation even Raekwon would appreciate—no Ice Cream metaphors needed.

Backend Developer   **36 Cloud Chambers | 2018 – 2020**

- Architected microservices so efficient, they moved like ninja stars through the cloud.
- Integrated APIs with OAuth2 because Protect Ya Neck applies to authentication too.
- Deployed applications with Kubernetes—because even Doom bots need orchestration.
- Maintained test coverage so tight it'd make a cypher look sloppy.

EDUCATION

M.S. in Computer Science   **University of KMD | 2015 – 2017**

B.Sc. in Software Engineering   **The Infamous Polytechnic | 2011 – 2015**

TECHNICAL PROJECTS

MF Doom's AI Lyric Generator   **2022**

- Trained a deep learning model to generate rhymes sharper than a Doom mask edge.
- Implemented transformer networks that weave bars tighter than Supreme Clientele.
- Optimized text generation pipelines so clean, it's like Liquid Swords slicing through memory leaks.

CERTIFICATIONS

- Certified Shadowboxer - Wu-Tang Clan (They Taught Me Everything I Know) (Issued 2023)
- Villainous Cloud Architect - The Doom Academy (Issued 2022)

SKILLS

- Programming: Python, JavaScript, Rust, Shaolin Kung-Fu
- Frontend: React.js, Vue.js, Bulletproof UI Frameworks
- Backend: Node.js, Flask, Express.js, DangerDOOM APIs
- Cloud & DevOps: AWS, GCP, Kubernetes, Terraform, ODB's Wild Cloud Strategy
- Databases: PostgreSQL, MySQL, MongoDB, The RZA's Vinyl Archive
- Testing & CI/CD: Git, Selenium, Jest, PyTest, Jenkins, 16-Bar Stress Testing
